

WHITE PAPER: NSF Food Grade Food Zone Flexible Conduit Options

Confusing Definitions

Look up NSF certified manufacturer and product lists at <https://info.nsf.org/Certified/Food/>. There, products are listed as certified for food zones such as splash zones and food non-contact zones. Definitions published by NSF describe food zones, nonfood zones, and splash zones which can be confusing.

Health and Safety Guidelines

At NSF.com, volumes of guidelines are available about creating and sustaining hygienic conditions. ANAMET Electrical developed conduit that meets NSF and FDA requirements for hygienic applications.

If you have particular application needs, consider these ANACONDA SEALTITE® products
